Summary

Hi, my name is **Mohammed**, and I am a web developer, with a particular affinity for Front End development. I am a self-taught learner, passionate about exploring the intricacies of programming. It has been two years since I embarked on my programming journey, during which I have successfully completed numerous **projects**, including both Full Stack and Front End ones. In my quest for continuous growth, I actively seek out challenging projects that push me outside of my comfort zone, allowing me to acquire new knowledge and skills. Additionally, I consistently stay up-to-date with the latest technologies, ensuring that I am always at the forefront of the ever-evolving field.

Experience

Currently, I don't have experience with any company, but I have been self-taught for the past two years. Additionally, I create videos on [Youtube](#) about web development and share my experience. I have completed numerous projects encompassing both frontend and backend using various web app technologies, which you can explore on my portfolio. Some of the projects that I particularly like are:

1. **HASHTAG Web App**: HASHTAG is a comprehensive full-stack project, reminiscent of popular social media platforms like Facebook and Instagram. It enables users to share their posts and engage with others, providing a dynamic social media experience.
2. **HAPPYSHOP Web App**: HappyShop is a concise yet efficient e-commerce website that enables users to effortlessly browse through a diverse range of products and make purchases. With HappyShop, users can carefully select their desired items and enjoy a seamless buying experience.
- 3.

You can find all my other projects on my website [Portfolio](#).

Skills

ReactJS, ReduxJS, Javascript, Typescript, Html5, CSS, REST, NextJS, Tailwindcss, ExpressJS, REST API, GIT, Python
